Sainath Reddy C

AI Powered Performance Marketing Specialist | Google Ads, Meta Ads & Amazon Ads | Lead Generation, CRO & Analytics | 11+ Years in Digital Marketing
Greater Hyderabad Area

Summary

I'm a performance marketing professional with 11+ years of hands-on experience across paid media, lead generation, e-commerce, SEO, analytics and digital growth. Over the years, I've worked across education, manufacturing, e-commerce, pharmaceutical and agency environments, managing campaigns across Google Ads, Meta Ads and Amazon Ads. My approach to performance marketing is simple: understand where the business needs growth, identify the right audience, build the right funnel, track what is actually converting and continuously move the budget towards what works. A few numbers that reflect the kind of work I've handled: • Managed around #60L in annual advertising spend • Delivered 35x–50x ROAS across e-commerce campaigns • Maintained Amazon Ads ACOS at around 2% • Increased qualified leads by 3X within the first three months for a multi-location education business • Managed performance marketing and local digital presence across 50+ business locations

My core experience includes Google Search, Display and Video campaigns, Meta lead generation and remarketing, Amazon Sponsored Ads, audience segmentation, campaign optimisation, landing-page improvement, conversion tracking, GA4, GTM, reporting and budget management. I also work closely with creative, sales, web and CRM teams because paid media performs better when the entire journey from the ad to the landing page to lead follow-up is working together. AI has also become part of my everyday marketing workflow. I use tools including ChatGPT, Google Gemini, Claude, Perplexity, Microsoft Copilot and Google Flow for research, campaign planning, competitor analysis, creative ideation and faster marketing execution. What interests me most is not simply generating clicks or leads. I enjoy understanding which campaigns are producing better-quality opportunities, why they are working and how we can scale them without wasting budget. My current areas of focus include: Google Ads | Meta Ads | Amazon Ads | Performance Marketing | Lead Generation | Paid Media | CRO | GA4 | GTM

| Landing Pages | Audience Strategy | Remarketing | Marketing Analytics | AI-Assisted Marketing Hyderabad | Open to remote / pan-India sainathc786@gmail.com

Experience

Beginners World Preschool

Digital Marketing Manager

January 2025 - Present (1 year 9 months)

Hyderabad

- Own #50L in annual paid lead generation across Meta and Google for 50+ centre locations, covering campaign architecture, audience segmentation, budget allocation, optimisation and reporting, with two direct reports and an external creative agency.
- Delivered 450–500 admissions in year one at a blended cost per admission of ~#10,500 in preschool, a hyper-local, trust-driven category where parents shortlist within a 3–5 km radius and decide across multiple centre visits.
- Grew monthly enquiries from under 100 to 500–700 (3x in the first three months, ~6x since) by restructuring campaign funnels, tightening geo-targeting to centre catchment radii and rewriting messaging for local audiences.
- Built and launched 50 hyper-local landing pages, one per centre, mapped to catchment-level search intent and paired with location-specific ad groups, improving ad relevance and Quality Score and capturing "preschool near me" demand at centre level rather than brand level.
- Use generative AI to produce and test ad copy and page variants across all 50 centres, making locally-relevant messaging viable at a scale a two-person team could not otherwise cover.
- Rebuilt and maintain 50 Google Business Profiles, driving map-pack visibility, review velocity and organic walk-ins, reducing paid dependence on branded and proximity searches.
- Manage CPL across a wide seasonal band, from ~#200 on Meta and ~#500 on Google in normal trading to #600–1,000 and #1,500 at peak admission season, pacing budget and bids against auction inflation when competing chains enter the same catchments.
- Track CPL, lead quality and enquiry-to-admission movement by location in Kylas CRM, and run WhatsApp Business API drip campaigns to reduce drop-off between enquiry and admission.

- Build recurring Looker Studio dashboards and monthly reports used by the CEO for budget and channel decisions.

Rockwell Industries Limited

Assistant Manager Online - Ecommerce

October 2021 - January 2025 (3 years 4 months)

Hyderabad

- Managed #3.5L per month on Amazon Ads in normal trading, scaling to #6L per month during peak events such as Amazon Great Indian Festival, alongside Google and Meta budgets for the D2C business.
- Ran Sponsored Products, Brands, Display and Video for commercial refrigeration, a high-ticket, high-consideration category, holding ACOS at ~2% in normal trading and 3–4% at peak (25x–50x ROAS) while increasing spend by roughly 70%, with the majority on non-branded acquisition keywords rather than brand terms.
- Controlled wasted spend through weekly search-term analysis, negative keyword sculpting, keyword expansion and bid adjustment against a target ACOS.
- Planned and ran Google and Meta campaigns for the D2C storefront, supporting both direct sales and lead-generation objectives.
- Partnered with web and product teams on landing-page and on-site improvements to support conversion across the product range.
- Produced cross-platform performance reports for leadership, translating campaign data into budget, channel and optimisation recommendations.

Bharat Biotech International Limited

Executive at Bharat Biotech International Limited (Corporate Communications)

December 2018 - October 2021 (2 years 11 months)

Greater Hyderabad Area

- Ran digital channels and online reputation for Bharat Biotech and group companies through the COVID-19 and Covaxin period, one of the most heavily scrutinised corporate communications environments in Indian pharmaceuticals.
- Grew LinkedIn following from 13K to 100K and X (Twitter) from under 500 to 90K, securing platform verification during the vaccine rollout.
- Handled 300 to 400 enquiry emails and 100+ public comments per day at peak as part of the Covaxin communications team, coordinating messaging, misinformation response and escalations with corporate communications.

- Led the 2018 website rebrand and the SEO programme that followed, growing organic traffic from roughly 500 to 5,000 sessions per day by 2021 through improved content structure, keyword targeting and site architecture.
- Reported traffic, search visibility and content performance monthly using Google Analytics and Search Console, with recommendations to internal stakeholders.

DOXTO TECHNOLOGIES PRIVATE LIMITED

Digital Marketing Analyst

August 2015 - November 2018 (3 years 4 months)

Bangaon

- Managed Google Ads across Search, Display and Video for agency client accounts spanning multiple industries, owning keyword research, campaign builds, optimisation and reporting.
- Ran competitor, keyword and backlink analysis, using the findings to shape both paid and organic acquisition strategy.
- Delivered monthly client reporting covering performance findings, actions taken and next-cycle recommendations.

Collaborate Solutions, Inc

IT Recruiter

January 2014 - June 2015 (1 year 6 months)

Massachusetts Area

- Managed end-to-end recruitment lifecycle for IT professionals across multiple technology stacks using platforms like Dice and Indeed.
- Built and maintained a strong pipeline of candidates through job portals, networking, and referrals.
- Coordinated with clients and internal teams to match candidate profiles with business requirements.
- Negotiated compensation and facilitated smooth onboarding, ensuring closure of open positions within timelines.

redBus

Customer Service Representative

August 2011 - December 2013 (2 years 5 months)

Greater Hyderabad Area

- Managed customer support and account queries, ensuring timely resolution of service requests, complaints, and escalations.
- Handled high-volume inbound and outbound interactions, maintaining service quality and customer satisfaction.
- Documented customer interactions and feedback in internal systems, enabling better tracking and service improvements.
- Coordinated with internal teams to resolve complex issues and ensure seamless customer experience.
